Marion County

Health Bulletin

The Mission of the Marion County Health Department is to improve the quality of life through preventing disease and preventative health maintenance.

It's Never Too Early to Quit Smoking

CDC's Office on Smoking and Health (OSH) knows that it may take a number of tries before you're able to quit for good, but we also know that it can be done. In fact, so many people have quit that there are now more former smokers than current smokers in the United States. Quitting can be challenging, but you can find support for your quit journey where and when you need it, to raise your chances of quitting for good. This year, make a New Year's resolution to quit smoking for good.

Whether you've never tried to quit or have tried many times, a new year means another chance to create your successful quit plan. Even though adult smoking rates are at an all-time low, cigarette smoking remains the leading cause of preventable death in the country, with 480,000 people dying each year.

Smoking is linked to many dangerous diseases, including heart disease, type 2 diabetes, emphysema and cancer. Smoking around others hurts their health too. Breathing secondhand smoke can cause many of the same illnesses as smoking does. It can make children get sick more often, and smoking while pregnant raises the risk of a baby dying suddenly in the first year of life. No amount of secondhand smoke is risk-free.

Help is Out there!

There are many free resources to help you quit—no matter where you are in your quit journey.
Call Quitline today, 1-800-QUIT-NOW (1-800-784-8669).

The Marion County Health Department, for the month of January, is offering a **discounted** Thyroid Stimulating Hormone (TSH) blood test for the low price of **\$20!**
