Health Bulletin

The Mission of the Marion County Health Department is to improve the quality of life through preventing disease and preventative health

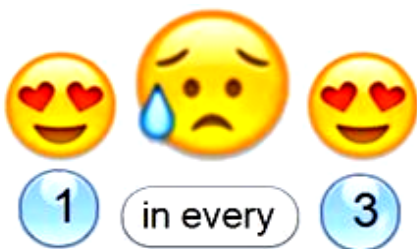

February is Teen Dating Violence (DV) Awareness Month! Teen DV Month is a national effort to raise awareness about abuse in teen and 20-something relationships and promote programs that prevent it. Dating violence is more common than many people think. One in three teens in the U.S. will experience physical, sexual or emotional abuse by someone they are in a relationship with before they become adults. Help us spread awareness and stop dating abuse before it starts. In February 2017, loveisrespect will be celebrating its 10th anniversary! So, we thought we would get back to basics. Our theme for Teen DV Month 2017 is *Love is...Respect*.

Teen dating violence is a preventable public health problem. It requires a comprehensive community-driven strategy to stop it before it starts.

- ◆ Approximately, 1 in 10 high school students has experienced physical violence from a dating partner in the past year.
- ◆ 1 in 4 adolescents reports verbal, emotional, physical or sexual dating violence each year.
- ◆ Across studies, 15-40% of youth report perpetrating some form of violence towards a dating partner.
- ◆ Risk factors for teen dating violence include individual, peer, partner, parent, and neighborhood influences.
- ◆ Perpetrating dating violence in adolescence increases the risk of perpetrating violence toward a partner in adulthood.
- ◆ Exposure to dating violence significantly affects a range of mental and physical health problems.
