Marion County

Health Bulletin

The Mission of the Marion County Health Department is to improve the quality of life through preventing disease and preventative health maintenance.

Breast Cancer Awareness Month

Except for skin cancer, breast cancer is the most common cancer in women in the United States. In 2021, an estimated 281,550 new cases of invasive breast cancer will be diagnosed in women in the U.S. as well as 49,290 new cases of non-invasive breast cancer. 63% of breast cancer cases are diagnosed at a localized stage (there is no sign that the cancer has spread outside of the breast). This year, an estimated 43,600 women will die from breast cancer in the U.S. Although rare, men get breast cancer too, about 2,300 men are diagnosed each year. It is estimated that in 2021, approximately 30% of all new women cancer diagnoses will be breast cancer. There are over 3.8 million breast cancer survivors in the United States. On average, every 2 minutes a woman is diagnosed with breast cancer in the United States.

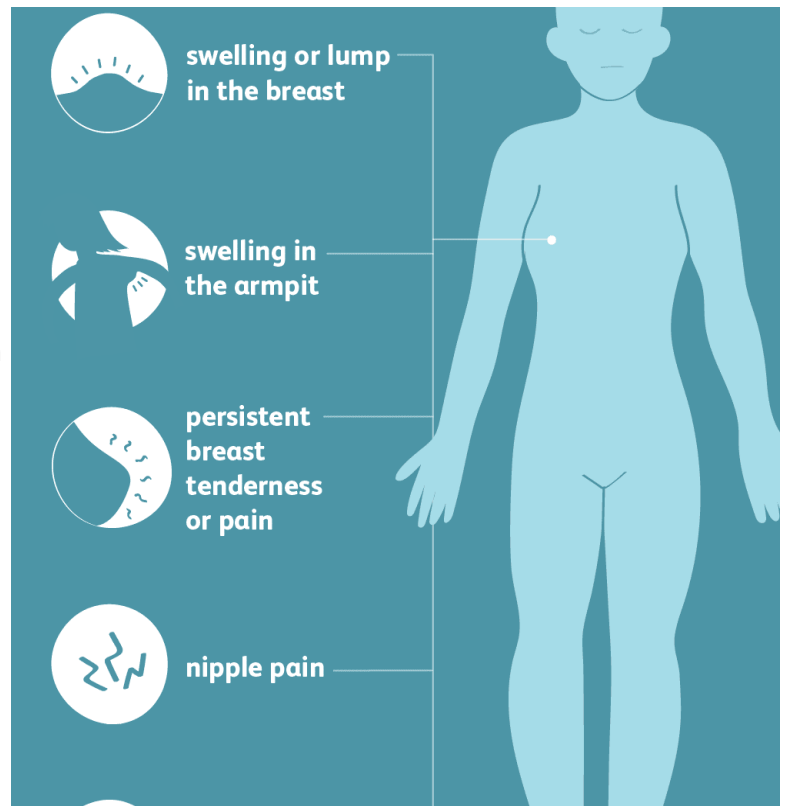

Early Detection

According to the American Cancer Society, when breast cancer is detected early, and is in the localized stage, the 5-year relative survival rate is 99%. Early detection includes doing monthly breast self-exams, and scheduling regular clinical breast self-exams and mammograms.

Most people who have breast cancer symptoms and signs will initially notice only one or two, and the presence of these symptoms and signs do not automatically mean that you have breast cancer.

By performing monthly breast self-exams, you will be able to more easily identify any changes in your breast. No breast is typical. What is normal for you may not be normal for another woman. Most women say their breasts feel lumpy or uneven. The way your breasts look and feel can be affected by getting your period, having children, losing or gaining weight, and taking certain medications. Breasts also tend to change as you age. Key is monthly self-exams and getting a mammogram yearly.

Be sure to talk to your healthcare professional if you notice anything unusual.
