Marion County

Health Bulletin

The Mission of the Marion County Health Department is to improve the quality of life through preventing disease and preventative health maintenance.

KEY TIMES to Practice Social Distancing

When Vaccine is Limited, Who Gets Vaccinated First?

Because of the supply of COVID-19 vaccine in the United States it is expected to be limited at first, CDC recommends that initial supplies of COVID-19 vaccine be allocated to healthcare personnel and long-term care facility residents.

The recommendations were made with these goals in mind:

- ◆ Decrease death and serious disease as much as possible.
- ◆ Preserve functioning of society.
- ◆ Reduce the extra burden COVID-19 is having on people already facing disparities.

Healthcare personnel and residents of long-term care facilities should be offered the first doses of COVID-19 vaccines.

Healthcare personnel including all paid and unpaid people who serve in healthcare settings and have potential for direct or indirect exposure to patients or infectious materials.

Residents of long-term care facilities are defined as adults who live in facilities that provide a variety of services, including medical and personal care, to people who are unable to live independently.

As vaccine availability increases, vaccination recommendations will expand to include more groups.

The goal is for everyone to be able to easily get a COVID-19 vaccination as soon as large quantities of vaccine are available. As vaccine supply increases but remains limited, Advisory Committee on Immunization Practices (ACIP) will expand the groups recommended for vaccination.
