Marion County

Health Bulletin

The Mission of the Marion County Health Department is to improve the quality of life through preventing disease and preventative health maintenance.

What to Expect after Getting a COVID-19 Vaccine

COVID-19 vaccination will help protect you from getting COVID-19. You may have some side effects, which are normal signs that your body is building protection. These side effects may affect your ability to do daily activities, but they should go away in a few days.

Common side effects

On the arm where you got the shot:

- ◆ Pain
- ◆ Swelling

Throughout the rest of your body:

- ◆ Fever
- ◆ Chills
- ◆ Tiredness
- ◆ Headache

Helpful tips

If you have pain or discomfort, talk to your doctor about taking over-the-counter medicine, such as ibuprofen, aspirin, antihistamines, or acetaminophen, for any pain and discomfort you may experience after getting vaccinated. You can take these medications to relieve post-vaccination side effects if you have no other medical reasons that prevent you from taking these medications normally. It is not recommended you take these medicines *before* vaccination for the purpose of trying to prevent side effects, because it is not known how these medications may impact how well the vaccine works.

To reduce pain and discomfort where you got the shot, apply a clean, cool, wet washcloth over the area. Also use or exercise your arm. To reduce discomfort from fever, drink plenty of fluids and dress lightly.

When to call the doctor

In most cases, discomfort from fever or pain is normal. Contact your doctor or healthcare provider:

- ◆ If the redness or tenderness where you got the shot increases after 24 hours.
- ◆ If your side effects are worrying you or do not seem to be improving after a few days.
