Marion County

Health Bulletin

The Mission of the Marion County Health Department is to improve the quality of life through preventing disease and preventative health maintenance.

When it comes to stroke, every minute counts. Acting **F.A.S.T.** can help stroke patients get the treatments they need to survive and reduce damage to the brain.

According to CDC, more than 3 out of 5 people are aware of all major stroke symptoms and know to call 911 when someone is having a stroke. There's more work to do-let's make it 5 out of 5!

Stroke Signs and Symptoms

During a stroke, every minute counts! Fast treatment can lessen the brain damage that stroke can cause.

By knowing the signs and symptoms of stroke, you can take quick action and perhaps save a life-maybe even your own.

Signs of Stroke in Men and Women

- ◆ Sudden numbness or weakness in the face, arm, or leg, especially on one side of the body.
- ◆ Sudden confusion, trouble speaking, or difficulty understanding speech.
- ◆ Sudden trouble seeing in one or both eyes.
- ◆ Sudden trouble walking, dizziness, loss of balance, or lack of coordination.
- ◆ Sudden severe headache with no known cause

Call 911 right away if you or someone else has any of these symptoms.

Acting **F.A.S.T.** can help stroke patients get the treatments they desperately need. The stroke treatments that work best are available only if the stroke is recognized and diagnosed within 3 hours of the first symptoms. Stroke patients may not be eligible for these if they don't arrive at the hospital in time.

F-Face: Ask the person to smile. Does one side of the face droop?

A-Arms: Ask the person to raise both arms. Does one arm drift downward?

S-Speech: Ask the person to repeat a simple phrase. Is the speech slurred or strange?

T-Time: If you see any of these signs, call 911 right away.

Note the time when any symptoms first appear. This information helps health care providers determine the best treatment for each person. Do not drive to the hospital or let someone else drive you. Call an ambulance so that medical personnel can begin life-saving treatment on the way to the emergency room.

If your symptoms go away after a few minutes you may have had a transient ischemic attack (TIA). Although brief, a TIA is a sign of a serious condition that will not go away without medical help. Unfortunately, because TIA's clear up, many people ignore them. But paying attention to a TIA can save your life. Tell your health care team about your symptoms right away.
