Marion County

Health Bulletin

The Mission of the Marion County Health Department is to improve the quality of life through preventing disease and preventative health maintenance.

Tornado Preparedness and Response

Preparedness involves a continuous process of planning, equipping, training and exercising. Planning for tornadoes requires identifying a place to take shelter, being familiar with and monitoring your community's warning system, and establishing procedures to account for individuals in the building.

Know between a Tornado Watch and a Tornado Warning

Tornado Watch—Tornadoes are likely to occur in the watch area. Be ready to act quickly and take shelter, and check supply kits. Monitor radio and television stations for more information.

Tornado Warning—Imminent threat—A tornado has been sighted in the area or has been indicated by radar. Take shelter immediately.

Identifying Shelter Locations

An underground area, such as a basement or storm cellar, provides the best protection from a tornado. If an underground shelter is unavailable, consider the following: Seek a small interior room or hallway on the lowest floor possible; stay away from doors, windows, and outside walls; stay in the center of the room, and avoid corners because they attract debris; avoid auditoriums, cafeterias and gymnasiums that have flat, wide-span roofs.

Tornadoes vary greatly in their appearance and can occur with little or no warning. It is important to know the signs that a tornado could be imminent. A dark, often greenish sky; a wall cloud, particularly if it is rotating; large hail; and a loud roar, similar to the sound of a freight train.

After a Tornado

Continue to listen to your battery-powered NOAA Weather Radio or local radio or television if possible, for updated information. Assess any damage to your home or immediate surroundings. Be aware of any potential hazards such as ruptured gas lines, structural damage to your home, downed electrical lines and localized flooding. Immediately report any injury hazards via 9-1-1. Advise your family and neighbors as well.
