Marion County

Health Bulletin

The Mission of the Marion County Health Department is to improve the quality of life through preventing disease and preventative health maintenance.

September is Emergency Preparedness Month

Preparedness Checklist

Often in an emergency or disaster, electricity, water, internet or telephone service may not work. Everyone should have basic supplies in order to survive in the event of an emergency.

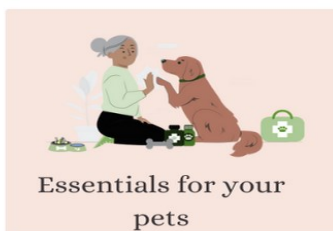

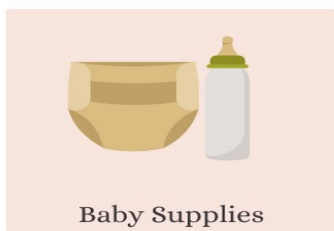

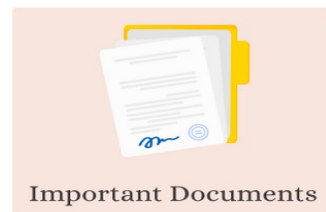

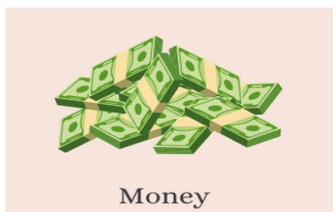

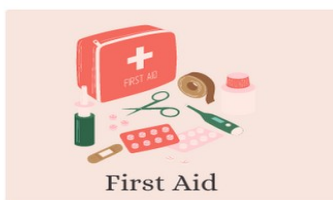

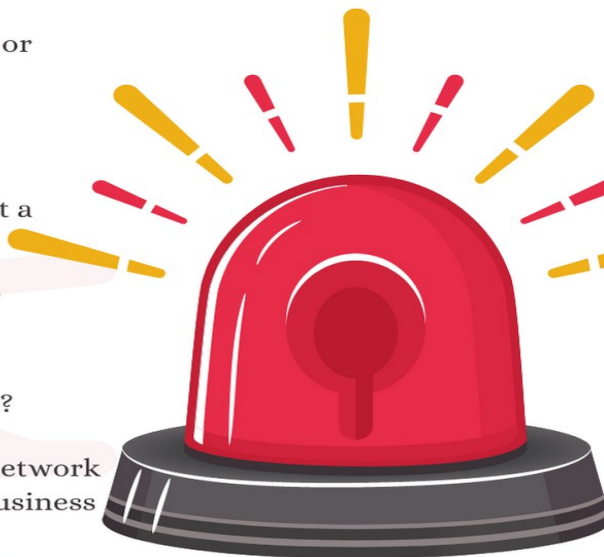

Your family may not be together if a disaster strikes, so it is important to know which disasters could affect your area. Put a plan together by discussing the questions below:

- How will I receive emergency alerts and warnings?
- What is my shelter plan?
- What is my evacuation route?
- What is my family/household communication plan?

Discuss your needs and responsibilities and how people in a network can assist each other with communication, care of children, business or pets.

Determine any special assistance you may need and include plans for that assistance in your emergency plan.

An emergency supply kit must be robust and contain enough food, water, medicine, and other consumables to last up to seven to ten days.
