Marion County

Health Bulletin

The Mission of the Marion County Health Department is to improve the quality of life through preventing disease and preventative health maintenance.

September is...

NATIONAL CHOLESTEROL EDUCATION MONTH

High cholesterol doesn't have symptoms, causing many people to be unaware that their levels are high.

The only way to know whether you have high cholesterol is to **get your cholesterol checked**. This is done with a simple blood test, called a "lipid panel," to measure your cholesterol levels.

Marion County Health Department is pleased to offer
a free Lipid Panel with the purchase of a General Health Panel
throughout the month of September!

LDL (low-density lipoprotein) cholesterol, sometimes called "bad" cholesterol, makes up most of your body's cholesterol. High levels of LDL cholesterol **raise** your risk for heart disease and stroke.

TYPES OF CHOLESTEROL

HDL (high-density lipoprotein) cholesterol, sometimes called "good" cholesterol, absorbs cholesterol in the blood and carries it back to the liver. The liver then flushes it from the body. High levels of HDL cholesterol can **lower** your risk for heart disease and stroke.
