

HANDWASHING

Code Section: 2-301.12 Cleaning Procedure

Proper Handwashing

- Always wash hands in a hand sink
- Rinse hands under running, clean, warm water
- Apply soap and rub hands together vigorously for at least 10-15 seconds
- Thoroughly rinse hands under running, clean, warm water
- Dry hands using paper towels or a heated air drying device
- To avoid recontamination, turn water off using a paper towel

When to Wash Hands:

- After touching bare skin, hair, or clothing
- After using the toilet
- After caring for or handling service animals
- After coughing, sneezing, using a handkerchief or disposable tissue
- After using tobacco, eating, or drinking
- After handling soiled equipment or utensils
- During food preparation, as often as is necessary to remove soil and contamination and to prevent cross-contamination when switching tasks
- Switching between working with raw food and working with ready-to-eat food
- After changing a diaper
- Before putting on gloves for working with food
- After engaging in other activities that contaminate hands

- 

1. Wet hands with warm water and apply soap.
- 

2. Rub hands for 10-15 Seconds. Get under fingernails and between fingers.
- 

3. Rinse under warm running water.
- 

4. Dry hands on your own clean towel.
- 

5. Turn off water with paper towel. Throw towel away.
