Screening Checklist for Contraindications to Vaccines for Infants, Children and Teens

For parents/guardians: The following questions will help us determine which vaccines your child may be given today. If you answer "yes" to any question, it does not necessarily mean your child should not be vaccinated. It just means additional questions must be asked. If a question is not clear, please ask your health care provider to explain it.

		YES	NO	Unknown

5.	If the patient to be vaccinated is 2 through 4 years of age, has a health care provider told you that the child had wheezing or asthma in the past 12 months?

If services will be billed, I authorize Marion County Health Department to release service related information regarding the above mentioned to third party payers and to bill for services rendered to patient if applicable and to the inclusion of service data into the I Care & Cornerstone data base. I request my payer to pay MCHD directly for services rendered to patient. I understand I am responsible for payment in the event my third party payer determines I am ineligible for this benefit.
